

BODEGAS MEDRANO IRAZU

MÁS DE MEDRANO FINCA LAS AGUZADERAS

The selection start in our state "Las Aguzaderas" Located at an altitude of 620 metres. We have selected three plots, according with orographic parameters (type of soil, its orientation). Thanks to our arbour and planting system our vines have a yield production of 500 kg/ha (DOCa Rioja Controll Board allows 6500 kg/ha). Once the harvest reach our Bodega, we select bunches one by one. The malolactic fermentation of this wine is done in oak deposit of 70 hl and after this is going to be aged in new American oak barrels.
